

Variables

```
#include <stdio.h>
int main()
{ int a;
  return 0;
}
```

Syntax :

data-type variable-name;

- ① Declaration -
- ② Assigning -
- ③ Declaration + Assigning -

```
#include <stdio.h>

int main()
{
  int a;
  a = 50;
  printf("Hello World");
  return 0;
}
```

Declaration
Assigning

50
4B

main.c

```
1
2 #include <stdio.h>
3
4 int main()
5 {
6     int a = 40;
7     printf("%d", a);
8
9     return 0;
10 }
```

Declaration + Assigning

input

40

Rules :

① variable can start letter's (no) underscore (_)

valid : _age, age_, age, bank_id

Invalid : 1age, #temp, @age (all marked with a circled X)

② can contain letters, digits and underscore's

valid : age1, Bank_id1

Invalid : 1age, Bmx-id (both marked with a circled X)

③ Case Sensitive

valid : age
↳ while calling age

Invalid : age
↳ while calling Age (marked with a circled X)

④ NO keywords are allowed

⑤ variable name length should not exceed the length more than 31 characters

⑥ must declare before use
↳ mandatory declare

```
[int a;  
char ch;  
float f;]
```

C language

↳ 32 keywords

int
char
float
double

→ datatype
(not) keywords
